

MERCURY

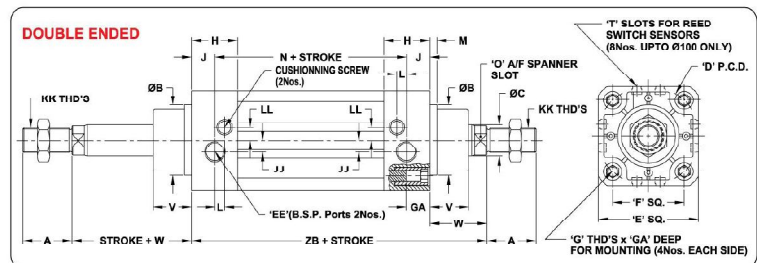

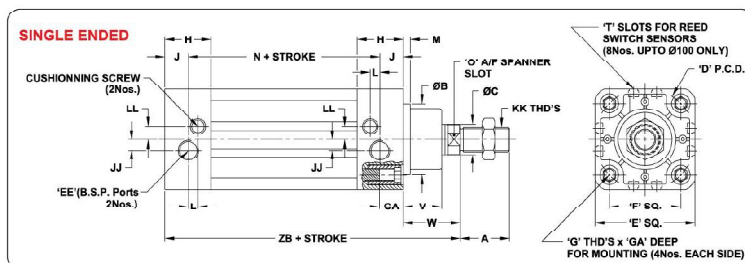

PNEUMATIC CYLINDERS

MICRO CYLINDERS

Salient Features

- Unique design, Low friction, Self adjusting, Double acting 'T' seal for Smooth, Jerk free motion.
- Precision honed barrel and super finished piston rod for low friction and long seal life.
- Strokes up to 1000 mm.
- Serviceable type cylinders.
- Double ended and single acting spring return models available against specific requests.

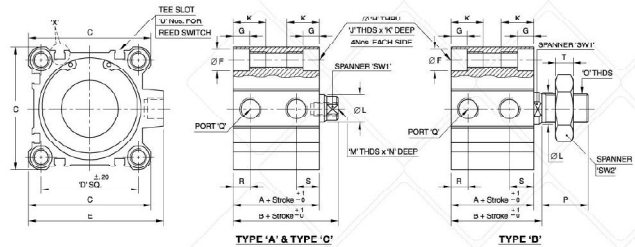

COMPACT CYLINDERS

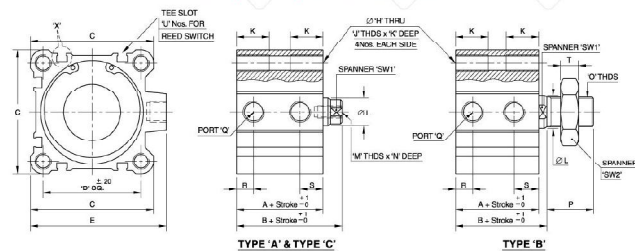

MERCURY

Compact Cylinders : Series 'S'

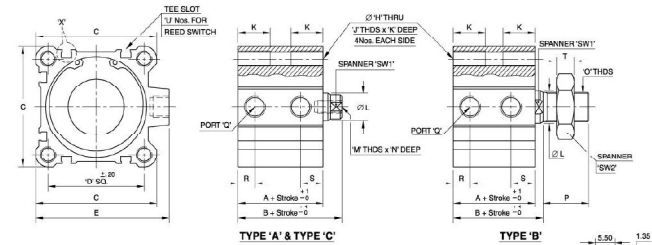

Compact Cylinders : Series 'F'

Compact Cylinders : Series 'D'

The Mounting Dimensions as per VDMA 24562

TYPE 'A' - DOUBLE ACTING, FEMALE THREADS, MAGNETIC PISTON
 TYPE 'B' - DOUBLE ACTING, MALE THREADS, MAGNETIC PISTON
 TYPE 'C' - SINGLE ACTING, FEMALE THREADS, SPRING RETURN, NON MAGNETIC PISTON

Salient Features

- Compact & light weight
- Single and Double acting models
- International standard 'T' slot for magnetic sensing switch
- Long life, positive locking reed switch
- Well guided piston & piston rod
- Self adjusting, low friction 'T' ring piston seal
- Rubber cushioning at both ends
- Magnetic piston with special rubber magnet as standard
- Mounting & overall dimensions to suit leading international brands
- Special mounting dimensions available on request
